Target	32	-	890

*excludes participants with pending 7-14 day calls, those who are withdrawn and ineligible

June Updates:

- 2 weeks ago we hit the significant milestone of over 50 participants randomised in the Phase III trial! Thank you to all of our recruiters for your efforts to help us get there, particularly during such a challenging time.
- In order to meet our recruitment target we now need each site to recruit approximately 2 participants per week. This may not be possible each week but it something we really want you all to aim for. As more sites get approval to start and can share the load, this per-site target should reduce.
- Congratulations to the team at Alfred Hospital who have achieved recruiter of the month for the first time with 4 participants in June! Well done and keep up the good work.
- Farewell & best wishes: Mark Gocotano from Alfred Health who is moving onto another position. We are grateful for his efforts for the ReCAPS Collaborative, including achieving recruiter of the month in his final ReCAPS month.

2/ week is the magic number
