Sunshine Coast	1	8	7
Total	9	249	204
Target (Month - Overall)	52	N/A	890

*excludes participants with pending 7-14 day calls, those who are withdrawn

August Updates:

- This month we reached the milestone of 200 participants randomised. This is an excellent achievement despite the challenges COVID-19 has created. We still need another 460 participants randomised for the adaptive analysis. We could achieve this by May 2022 if 13-14 participants are recruited collectively per week. Please keep up your great work!
- It was exciting to have one participant successfully complete their e-consent and some baseline surveys electronically. To assist with this process please ensure participants are sent home with a study pack including a paper copy of their PICF, the goal setting menu, study brochure and infographic.
- It was timely that this month clinicians from Eastern Health, Sunshine Coast hospital, St Vincent's Sydney and Royal Adelaide hospital joined our monthly meeting to demonstrate the process for e-consent. A training video will be distributed shortly and an update to the procedure manual for using the option of electronic surveys at baseline.

Help us to help you!

Each month we are scheduling zoom meetings to talk about any obstacles to recruitment or data issues. Please contact Jan or Olivia if you have a specific question or issue you would like to discuss.
