October Updates:

- We are excited to announce Nikki Hall from Logan Hospital has come on board and begun training and Site initiation—Welcome Nikki!
- Process evaluation is an important aspect of ReCAPS for the scalability of the intervention. A survey for clinicians was recently distributed to assess how the trial is going, to learn what is working, or not. This is important feedback and would appreciate completion of the survey at your earliest convenience.
- While recruitment is on the slow side, we are going through documentation to ensure GCP compliance. Olivia will be sending around a check list to assist in confirming that relevant documents are up to date and located in your Investigator folder. If you are able to complete and return this form so that we can send out any updates if needed.

Help us to help you!

Each month we are scheduling zoom meetings to touch base and discuss issues or provide extra training. Please contact Jan or Olivia if you have a specific question or issue to discuss.
